

Pembina County North Dakota

An overview of how the system works:

- * Streets run East and West
- *Avenues run North and South
- *Each section equals 1 mile
 - * Each mile is divided into 100 numbers
 - *Odd numbers are to the North and West
 - *Even numbers are to the South and East
- * Federal, State, and County highways were not renamed.
- * All correction lines are followed

Resident numbers:

1st, 2nd, or possibly 3rd number –Which ST or AVE Range it falls.

3rd, or possibly 4th number Tenth of a mile

4th, or possibly 5th number Hundredth of a mile– And Even or Odd

ODD to the West and North

Even to the East and South

Since Pembina county is in the Northeast corner of the state, all streets and avenues end in NE.

Unincorporated cities were addressed differently because they wouldn't fit into this addressing system. Old plat maps were consulted to address these areas. Rural subdivisions were addressed much like the unincorporated cities. Each road was assigned a name.

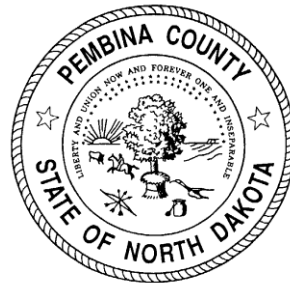

The incorporated cities addressed their own residents and gave the county the information to put into address database.

A Pembina County map is included which illustrates how the system works in the rural area.

At the time this brochure was created, the county is not requiring rural residents to post house numbers. However, if you live in an area where there are several houses in a row, or perhaps in a rural subdivision or unincorporated city, you may want to post a house number on your own.

If you are unsure of what your address is, or have any questions call the Pembina County 911 Administration Office at 265-8222.

Please have an accurate description of where you live, preferably with your township and section number.

Pembina County E911 Addressing System

The rural addressing for Pembina County used a system called the "Modified Burkle Addressing Plan". This addressing scheme is a standard for ND 911 systems for ND systems approved since 1993. This addressing scheme is coordinated with postal authorities.
